Jackson's California Grown Zinnias

Zinnia—California Giant

Dahlia-Flowered Zinnias

The Dahlia-Flowered Zinnia is the latest thing in the Zinnia line and is undoubtedly the most handsome one that has been propagated so far by any grower. They are exceptionally large and the many shades and colors in which they come make them simply indescribable.

EXQUISITE. By far the most pleasing of our collection. Truly dahlia-flowered as regards form and size; color a beautiful light rose with a deep rose center.

GOLDEN STATE. A very rich orange, yellow in the bud turning to an attractive orange when in full bloom.

SCARLET FLAME. A large, beautiful bright scarlet with a delightful blending of orange throughout the petals.

LEMON BEAUTY. A beautiful new shade, a somewhat golden yellow on brown; should be in every collection.

DREAM. A fine, deep lavender, turning to a purple (mellow purple), a new and very desirable shade in the Zinnia line.

PURPLE PRINCE. A fine deep purple, large and well formed; this is a new one and very pretty.

POLAR BEAR. A very large, pure white, true dahlia form and the best white in a Zinnia.

BUTTERCUP. An immense deep creamy yellow, which is very beautiful and should be in every collection.

CRIMSON MONARCH. By far the largest and best of the red shades. Flowers often 8 inches in diameter. Plant very vigorous.

SPECIAL MIXTURE. Contains all of the above named Dahlia-flowered Zinnias and others that we do not list; this mixture is made especially for us by our grower.

Price of all above Dahlia-flowered Zinnias: Pkt. 15c; 2 pkts. 25c; ½ oz. 90c; oz. \$1.75, postpaid.

You can plant Zinnias in March, April, May, June, July, August, September and sometimes in October.

Jackson's Mammoth Zinnias

The plants of this variety are taller than the Dahlia-Flowered type, with long stems which are adapted particularly for cut flowers. The flowers are very large and flat, giving a graceful effect.

ROSE QUEEN. The most striking bright rose in color. Pkt. 15c; 2 pkts. 25c.

CERISE QUEEN. A beautiful cerise rose. Pkt. 15c; 2 pkts. 25c.

Lilliputs—Double Zinnias

Lilliput Zinnias or Dwarf Double

The Lilliput Double Zinnias are a new introduction and have justly gained in popularity until now they are being used in solid masses in esplanades on boulevards. The River Oaks addition here at Houston planted their esplanades throughout the addition with our Lilliput Zinnias and created a sensation. The flowers, as the name would indicate, are small and very double, growing on a dwarf bush and can be used to good advantage as borders or in solid beds. They are new, beautiful and something different in Zinnias. They are to be obtained in the following shades:

CANARY-YELLOW
WHITE GEM
CRIMSON GEM
GOLDEN GEM
SCARLET GEM
SALMON-ROSE
PURPLE ROSE PINK

SPECIAL MIXTURE. Containing all of the above shades.

Jackson's Imported Wong Bok or Chinese Cabbage

Be sure and try some of this wonderful variety, as it is easy to grow. Pkt. 10c; oz. 35c, postpaid.

Bermuda Onion Plants

The usual manner of growing green Onions has, in the past, been by planting sets, but various tests have been proven that the Onion plant is preferable. The set has to be absorbed by the new growth before it begins to form the new Onion, whereas the plant begins to grow as soon as it is planted and makes more headway than the set, producing delicious young Onions for table use during the winter and spring. Onions grown from plants are larger and do not run to seed in the spring like sets. Onions like rich soil, so the ground should be liberally fertilized. Plant in rows about 15 inches apart and 3 or 4 inches apart in the row. 100 for 25c; 200 for 45c; 600 for \$1.00; 1,000 for \$1.50; crate of 6,000 for \$4.00, all postpaid to you.

Hints for Making and Caring for Lawns

Houston is noted for its beautiful lawns, and so few people appreciate that a winter lawn can be made to look as attractive as a summer lawn, and be green the entire winter. So do not let another winter go by with that old, dead grass on your lawn. English Rye and Italian Rye are good winter grasses and stay green all through the winter.

JACKSON'S WINTER GRASS (Domestic Rye). This is the foremost winter grass and the foundation of all winter lawn mixtures, and we know of no better grass for winter lawn. Should not be planted until the weather is cool, as it will not germinate in the hot months. Plant seed using one pound to a space 10 by 15 feet. It is easy to grow and makes one of the most wonderful lawns with that beautiful green, velvety cast, such a contrast to other vegetation that is dead for the winter, which surrounds most lawns. The seed should be broadcast, following same with thin coating of dirt, then wetting it down, and in a few days the seed will begin to germinate. Just for your own satisfaction, seed your lawn down this winter in Winter Grass. 1 lb. 25c; 3 lbs. 50c; 10 lbs. \$1.25; 25 lbs. \$2.75, postpaid. Not prepaid, 50 lbs. \$5.00; 100 lbs. \$9.00.

RED TOP. This variety of Winter Grass has been used in the North for years, and until recently it was never planted in Texas, but is now a very popular Winter Grass. It is used extensively in mixtures and on most all golf links. A fine variety for shady places. A mixture of English Rye and Red Top makes the best winter lawn mixture you can buy. Use at the rate of one pound to a space 10 by 25 feet, Lb. 65c; 5 lbs. \$2.75; 10 lbs. \$5.00, postpaid. Write for prices in larger quantities.

WHITE CLOVER. Also called "White Dutch Clover". This is the small, low-growing Clover that is so much desired for lawns; nothing is more beautiful than a little White Clover dotting a beautiful green lawn here and there. Used extensively in lawn mixtures. Lb. 75c; 5 lbs. \$3.00, postpaid.

JACKSON'S LAWN GRASS MIXTURE. This special mixture produces a beautiful and permanent lawn. CARPET GRASS. Sometimes called Australian Bermuda. Excellent for lawns as it is a perennial, spreading by creeping stems with root at every joint, thus forming a close, compact turf. Seed very scarce on account of crop being short. Lb. 50c; 5 lbs. \$2.25; 10 lbs. \$4.00, postpaid.

KENTUCKY BLUE GRASS. Suitable in some places in Texas and very desirable for sowing under trees. Lb. 65c; 5 lbs. \$2.75; 10 lbs. \$5.00, postpaid.

Jackson's Prize-winning Dahlias

Jackson's Dahlia Roots for South Texas

CULTURE. We are learning each year more about the culture of dahlias in this section and some of the exhibits at the flower shows this fall of home grown dahlias were almost as large as those raised in the dahlia section. Spade your soil deep, plant the bulb flat. After the plants are up out of the ground it is a good plan to place about one-half inch of mulch about the base of the plant. This will hold moisture in the soil except in extremely dry weather. Lawn clippings, peat moss and even straw or hay will make a good mulch. If you feel that the soil is weak and lacking in quality, it is a good plan to rake in a little bone meal before the mulch is applied. Don't let the ground get a hard crust. In watering dahlias, don't try and overdo it. Just replace the normal amount of moisture in the ground.

AVALON (Formal Decorative). The color is a rich lemon yellow of enormous size carried on long stems. Fine for cutting as the flowers keep particularly well.

JERSEY BEAUTY (Formal Decorative). A clear pure pink dahlia. One of the outstanding dahlias, known by all.

JANE COWL (Informal Decorative). One of the best and most popular. Immense bronzy buff, lighted old gold.

DADDY (Informal Decorative). In our opinion best garden red regardless of price, very free bloomer.

SANCHEN'S BLUEBIRD (Informal Decorative). Bright violet blue. Splendid flowers produced freely on good stems. One of our best sellers.

FORDHOOK MARVEL (Formal Decorative). A giant sheen bloom. Color, peach red shading to strawberry pink suffused salmon orange. Vigorous plant and a great producer. Don't miss this one.

AMERICAN EAGLE (Semi-Cactus). A beautiful large crimson variety, very early and a profuse bloomer.

HARRY MAYER (Formal Decorative). Silvery pink, reverse rose pink. Extremely large blooms.

JEAN KERR. One of the most popular of the pure white dahlias.

Price of above dahlias: Root, 25c; 5 roots, \$1.00.

Three of Our Choicest Varieties

THE COMMODORE (Informal Decorative). This is a prize winner. One of the largest clear sulphur dahlias. If you enjoy growing monster blooms here is your chance. Root, 50c.

ROSE FALLON (Formal Decorative). The color is a dark orange, tinted with amber and salmon. Massive blooms that stand well above a vigorous growing bush. Root, 50c.

OMAR KHAYYAM (Formal Decorative). A Chinese red at base of petals, shading to a brighter orange with paler tips, giving a soft effect. Price, 50c root.

Jackson's Dahlias From Seed

So many people do not know that you can raise dahlias from seed and they will bloom the first season about four weeks later than from tubers.

CULTURE. Sow seed in flats, covering lightly with sand, screened leaf-mold and similar material. Place a square of burlap on top of seed bed and keep moist until seed is germinated, removing the burlap as soon as sprouts appear.

When plants are 4 to 5 inches high, pot them and when well established transplant to the garden.

EXTRA SELECT EXHIBITION MIXTURE. All hand picked from the very finest larger flowering and double varieties. Many wonderful seedlings have resulted from this strain of seed. Pkt., 50c; 3 pkts., \$1.00.

GIANT CACTUS MIXED. Very large, double flowers. Pkt., 50c; 3 pkts., \$1.00.

UNWIN'S DWARF HYBRIDS. Miniature semi-double flowers in a wide range of charming colors. Height 18 to 24 inches. Pkt., 35c; 3 for 75c.

Miscellaneous Bulbs

ANEMONES. These are among the most showy and beautiful of spring flowers; of neat and compact growth, with elegantly cut foliage and the most brilliantly colored blossoms. Their large velvety flowers are ideal for cutting, lasting several days in water.

Anemones prefer a rich loamy soil, and a liberal amount of water. Soak the bulbs in lukewarm water 24 hours before planting. Mixed colors, 60c dozen; 2 dozen, \$1.00.

TIGRIDIA (Shell Flower of Mexico). Few flowers are more gorgeously colored or so beautiful. Plant in sunny positions in a flowery border in well drained soil. Put a little sand under the bulb. Can also be used in beds. Height, 3 feet. Mixed, 15c bulb; 4 for 50c; \$1.50 dozen.

RANUNCULUS (Buttercup). Beautiful double flowers resembling roses. Grows from a foot to two feet tall. Our special mixture contains all shades of red, pink, orange, yellow and a few white.
